### Commentary (Q2/2004)

For FY 2004, we are under the 79 day target with a median of 77 days; however, 2nd Quarter results were 84 days, exceeding the target by five days. Time to fill for Aviation Safety Inspectors, Computer Specialists, Engineers and Engineer Tech was 53 days this quarter. However, time to fill for Airway Transportation Systems Specialists and Air Traffic Controllers was 83 days and 211 days respectively.

All of the Air Traffic Controller actions for the 2nd Quarter were internal actions of current employees which required a waiver from the Air Traffic Resource Management Program. To meet mission requirements, Air Traffic Controller release dates must be coordinated with backfills.

NOTE: These data are calculated based on medians rather than mathematical averages.
